

Mrs. Neeta D. Vartak, Mumbai, India

I noticed that my eye sight vision was deteriorating & on 17th August I could not see properly although there was some sensation in the eye. After discussing with my husband, I visited an eye specialist. According to the doctor, the pain was not due to any normal eye problem like increase of focal sight number, but it was due to swelling of the retina, the main vein, which appeared to be blocked. He advised me to go for angiography of the eye & the test revealed that retina was indeed affected. He gave me eye drops, antibiotic tablets & recommended to take injection costing Rs. 70,000/- & if required further, to go on for the eye surgery. The tablets were so strong that I started vomiting & also had severe pain in the stomach. Subsequently one of the Lord Krishna devotee Mrs. Alka Pai told me about the advice given by P.P. Tai - "to chant daily a particular shloka of 11th chapter of Bhagavad Gita for 108 times" - to solve health problem. She gave the reference of the past when P.P. Tai suggested one of the devotee to chant the shloka 108 times daily for the problem of blood clots in the brain. The problem got solved after chanting. I started chanting for 108 times daily & now it takes only 11 minutes. To my surprise my vision was restored and the swelling of the retina subsided. I visited the doctor for check up & on examining my eyes, the doctor was stunned and remarked that it is nothing short of a miracle. With just eye drops & chanting of 36th stanza of 11th chapter of Gita as recommended by P.P. Tai, my health issue was overcome. This is the power of Lord Krishna's grace. "Om Namo Bhagavate Vasudevaya".
