

Smt. Vandana Kulkarni, Mumbai, India

I am from a family from the Sion-Chunabhatti area in Mumbai and have 2 daughters & a son. All are married and my son is settled in U.S.A. We went to the Krishna Kutir and had met Leelatai Karve in the year 1996 and since then we started visiting Badlapur occasionally. We both regularly visited Shree Krishna Leela Centre near my house during the prayer day in the week. My husband had retired after working with Reserve Bank of India on a respectable post. On 24th October 2007 before having lunch he collapsed with a massive heart attack. Subsequently I stayed with my daughter for one year at Thane and then went to U.S.A. & stayed with my son for six months. Thereafter I preferred to stay at my home at Sion. In March 2011 my son was to visit Mumbai for his office work with his wife after about 2 and half years. I was indeed very happy about this. However after receiving them from the airport, next day, I was not feeling well but I did not tell my son, since he was to visit his office & my daughter-in-law was to visit her mother. Then eventually I lost my balance & could not walk without support. I then called my daughter who got me admitted in nearby hospital. When the doctors attending me could not diagnose my health properly, on 3rd day I was shifted to Hinduja Hospital and underwent number of tests.

Dr. Ashok then revealed that my problem was due to clots developed in the brain. Everybody in my family got very disturbed & was attending me in the hospital. I used to vomit 10-12 times in a day. Doctor said unless the vomiting did not stop I could not undergo any treatment. I lost my weight from 50 to 35 Kgs & lost memory too. I even started murmuring irrelevant things. This state continued for about 25 days. Subsequently the vomiting subsided from 12 times to 3-4 times a day. I was then fed liquid food through the nose. Suddenly one day Leela Tai appeared in my dream, I saw that I was standing on the railway station & a train arrived & Tai got down. She met me & enquired about my health. I replied that I am not well. She told me not to worry & came to my house at Sion. She got the sad news about my husband & she consoled me. She said not to worry & took me to Krishna Kutir, Badlapur. We were discussing on matter of Lord Krishna. She said that I had very difficult time & now it is over. She assured me that now onwards I will recover very fast & will come out from this state of affair. Since it was late evening Tai asked me to stay overnight & leave in the morning. When I got up I was in the hospital. That time I was feeling quite fresh & very happy.

My son was sleeping in the hospital and when he got up he was glad to see me to see me happy & fresh. I then told him about my dream in detail. He was very happy to receive blessings from Lord Krishna & was confident that I will come out of the situation. Doctor visited in the morning and was surprised to see me quite fresh & remarked that she can now recover very fast. After 4 days of medication I got discharge from the hospital. Doctor then advised me to get physiotherapy & to do some exercise at home. After my recovery I started visiting the centre regularly. This experience I told in the centre on its Vardhapan day when about 75 devotees attended the event. After I reached home from the hospital my son left back to U.S.A. along with his wife. He was in contact with me every alternate day. Suddenly I got the news from him that he is going to become a father. I was eagerly waiting to hear this news for long time & Lord Krishna took care of me to see my grandchild. I continue visiting the Krishna Leela Centre till my health permits as I get lot of peace.
